

eigen-3.4.0/eigen-3.4.0
/unsupported/doc/examples
/PolynomialUtils1.cpp

```
graph TD; A["eigen-3.4.0/eigen-3.4.0<br>/unsupported/doc/examples<br>/PolynomialUtils1.cpp"] --> B["unsupported/Eigen/Polynomials"]; A --> C["iostream"]
```

The diagram illustrates the relationship between a source file and its components. A top box contains the full path 'eigen-3.4.0/eigen-3.4.0/unsupported/doc/examples/PolynomialUtils1.cpp'. Two blue arrows point from this box to two bottom boxes: 'unsupported/Eigen/Polynomials' on the left and 'iostream' on the right.

unsupported/Eigen/Polynomials
