

```
Eigen::internal::scalar  
_product_traits< ScalarA,  
ScalarB >
```

The diagram illustrates an inheritance relationship between two Eigen traits. At the bottom is a grey box representing the base trait, `Eigen::ScalarBinaryOpTraits< ScalarA, ScalarB, BinaryOp >`. A blue arrow points upwards from this box to a white box above it, representing the derived trait, `Eigen::internal::scalar_product_traits< ScalarA, ScalarB >`. Both boxes are divided into three horizontal sections, with the top section containing the trait name and the remaining two sections being empty.

```
Eigen::ScalarBinaryOpTraits  
< ScalarA, ScalarB, BinaryOp >
```
