

```
Eigen::internal::functor  
_traits< scalar_abs_op  
  < Scalar > >
```

The diagram illustrates an inheritance relationship between two Eigen functor traits. A light gray box at the bottom represents the base class, `Eigen::internal::functor_traits< scalar_score_coeff_op< Scalar > >`. A blue arrow points upwards from this box to a darker gray box above it, which represents the derived class, `Eigen::internal::functor_traits< scalar_abs_op< Scalar > >`. Both boxes are divided into three horizontal sections, with the first section containing the code and the other two being empty.

```
Eigen::internal::functor  
_traits< scalar_score_coeff  
  _op< Scalar > >
```
