

```
Eigen::internal::norm1  
_default_impl< Scalar,  
NumTraits< Scalar >::IsComplex >
```

The diagram illustrates an inheritance relationship between two Eigen library internal functions. A light gray box at the top represents the base class, `Eigen::internal::norm1_default_impl< Scalar, NumTraits< Scalar >::IsComplex >`. A darker gray box at the bottom represents the derived class, `Eigen::internal::norm1_impl< Scalar >`. A blue arrow with an open triangular head points from the top of the derived class box to the bottom of the base class box, indicating that the derived class inherits from the base class.

```
Eigen::internal::norm1  
_impl< Scalar >
```
