

Eigen::internal::default
_packet_traits

```
graph BT; A["Eigen::internal::packet_traits<half>"] --> B["Eigen::internal::default_packet_traits"]
```

The diagram illustrates an inheritance relationship between two Eigen packet traits structures. At the bottom is a grey-shaded box representing 'Eigen::internal::packet_traits<half>', which is divided into three horizontal sections. A blue arrow points upwards from the top of this box to the bottom of a white box above it. The white box represents 'Eigen::internal::default_packet_traits', also divided into three horizontal sections. The top section of the white box contains the text 'Eigen::internal::default_packet_traits', while the other two sections are empty.
