

Eigen::internal::default
_packet_traits

```
graph BT; A["Eigen::internal::packet_traits<int16_t>"] --> B["Eigen::internal::default_packet_traits"]
```

The diagram illustrates an inheritance relationship between two Eigen packet traits structures. The top structure, `Eigen::internal::default_packet_traits`, is represented by a white box with a black border and is divided into three horizontal sections. The bottom structure, `Eigen::internal::packet_traits<int16_t>`, is represented by a gray box with a black border and is also divided into three horizontal sections. A blue arrow points from the top of the gray box to the bottom of the white box, indicating that the gray box inherits from the white box.
