

Eigen::internal::default
_packet_traits

The diagram illustrates an inheritance relationship between two C++ structs. At the bottom is a grey-shaded box representing the base struct, `Eigen::internal::packet_traits< numext::int32_t >`. Above it is a white box representing the derived struct, `Eigen::internal::default_packet_traits`. A blue arrow points from the top of the grey box to the bottom of the white box, indicating that the white struct inherits from the grey struct. Both boxes are divided into three horizontal sections, with the top section containing the struct name and the bottom two sections being empty.
