

Eigen::internal::traits
< _MatrixType >

```
graph BT; A["Eigen::internal::traits<ColPivHouseholderQR<_MatrixType>>"] --> B["Eigen::internal::traits<_MatrixType>"]
```

The diagram illustrates an inheritance relationship between two Eigen traits classes. At the bottom is a gray box representing the base class: `Eigen::internal::traits<ColPivHouseholderQR<_MatrixType>>`. A blue arrow points upwards from this box to a white box at the top, which represents the derived class: `Eigen::internal::traits<_MatrixType>`. Both boxes are divided into three horizontal sections, with the first section containing the class name and the remaining two sections being empty.
