

```
Eigen::internal::traits  
< SparseMatrix< MatScalar,  
  MatOptions, MatIndex > >
```

The diagram illustrates an inheritance relationship between two Eigen traits classes. A light blue box at the top represents the base class, `Eigen::internal::traits<SparseMatrix<MatScalar, MatOptions, MatIndex>>`. A darker blue box at the bottom represents the derived class, `Eigen::internal::traits<Map<const SparseMatrix<MatScalar, MatOptions, MatIndex>>, Options, StrideType>>`. A light blue arrow points from the bottom box up to the top box, indicating that the bottom class inherits from the top class.

```
Eigen::internal::traits  
< Map< const SparseMatrix  
< MatScalar, MatOptions,  
  MatIndex >, Options, StrideType > >
```
