

```
Eigen::internal::traits  
< Matrix< _Scalar, _Rows,  
_Cols, _Options, _MaxRows,  
_MaxCols > >
```

The diagram illustrates the relationship between two Eigen matrix classes. A light gray box at the top represents the `Matrix` class, and a white box at the bottom represents the `Array` class. A blue arrow points from the `Array` box to the `Matrix` box, indicating that `Matrix` inherits from `Array`. Both boxes are divided into three horizontal sections. The top section of each box contains the `Eigen::internal::traits` template specialization. The bottom two sections are empty, representing other internal data or methods.

```
Eigen::internal::traits  
< Array< _Scalar, _Rows,  
_Cols, _Options, _MaxRows,  
_MaxCols > >
```
