

```
Eigen::internal::traits  
< SparseVector< MatScalar,  
  MatOptions, MatIndex > >
```

The diagram illustrates an inheritance relationship between two Eigen traits classes. A light gray box at the top represents the base class, `Eigen::internal::traits< SparseVector< MatScalar, MatOptions, MatIndex > >`. A dark gray box at the bottom represents the derived class, `Eigen::internal::traits< Ref< SparseVector< MatScalar, MatOptions, MatIndex >, _Options, _StrideType > >`. A blue arrow points from the top of the dark gray box to the bottom of the light gray box, indicating that the dark gray class inherits from the light gray class.

```
Eigen::internal::traits  
< Ref< SparseVector< MatScalar,  
  MatOptions, MatIndex >, _Options,  
  _StrideType > >
```
