

Eigen::internal::traits
< Derived >

The diagram illustrates the inheritance of the Eigen::internal::traits specialization. At the bottom is a gray box representing the base class, SparseCompressedBase, which contains the specialization Eigen::internal::traits< SparseCompressedBase < Derived > >. A blue arrow points upwards from this box to a white box above it, representing the derived class, Derived. This white box contains the specialization Eigen::internal::traits< Derived >. The white box is divided into three horizontal sections, with the top section containing the text. The gray box is also divided into three horizontal sections, with the top section containing the text.
